Illinois Campus Cluster Program
Golub Instance Service Level Definition

Term
The term of this agreement is for four (4) years from the original in-production service date of the Golub Instance. See the “Retirement Phase” section of the Overall Program Service Level Definition for the disposition of equipment at the normal end of term. The in-production service date for the Golub Instance is documented at https://campuscluster.illinois.edu/hardware/about_golub.html.

Service Overview
Investors in the Golub Instance also agree to the terms in the Illinois Campus Cluster Program Overall Program Service Level Definition.

Investors agree to invest in nodes for the Golub Instance during the first 12 months following the original in-production service date of September 3, 2013. The Golub Instance has adequate infrastructure to support a total of 512 nodes. The complete technical details are documented at https://campuscluster.illinois.edu/hardware/.

Termination
Either party may terminate this agreement by providing written notification to the other party thirty (30) days in advance of termination. In the event of termination, Investors may receive the nodes in which they invested. All nodes of the number and type in which invested will be transferred to the Investor.

Storage
Each Investor in the Golub Instance receives 40GB (usable) of User/Group Storage for every node in which they have invested. This allocation is governed per the terms in the Overall Program Service Level Definition.

Each standard node of the Golub Instance will be configured with 2TB (raw) of node-local scratch storage space. This is in addition to the shared scratch storage available on all Cluster Instance nodes.
Signature Page – Golub Instance

The term of this agreement is for four (4) years from the original in-production service date of the Golub Instance. See the “Retirement Phase” section of the Overall Program Service Level Definition for disposition of equipment at the normal end of term.
